

Phuoc Quy

+1 (605) 215-9257 - Portfolio - phuocquyforwork@gmail.com - [linkedin.com/in/Phuoc-Quy](https://www.linkedin.com/in/Phuoc-Quy) - github.com/Phuoc-Quy

Work Authorization: U.S. work authorized; OPT start date: 02/02/2027; no sponsorship required for the next 3 years.

TECHNICAL SKILLS

Programming Languages: Python, C/C++/C#, Java, HTML, CSS, JavaScript, TypeScript, SQL

Frameworks/Libraries: React/React Native, Expo, Node.js, .NET

Databases: PostgreSQL, MySQL, Redis, LINQ

Cloud: AWS, Azure

DevOps: Docker, Kubernetes, Jenkins, Github Actions

Tools: Git, Linux, AI/Developer Tools

Languages: English, Vietnamese

WORK EXPERIENCE

IoT Network Technician - Internship

Delray Beach, FL, USA

Foundation Pharmacy, LLC

June 2026 - August 2026

- Deployed and configured 8 workstations and 1 automated packaging machine, establishing reliable network connectivity for daily operations.
- Integrated workstation systems with company software through API configuration, enabling automated communication between operational equipment and internal systems.
- Optimized network connectivity across workstations and IoT equipment, accelerating workspace readiness and allowing workers to begin operations 2 days ahead of schedule.

Instructional Student Assistant

Long Beach, CA, USA

California State University, Long Beach

January 2025 - December 2025

- Assisted in teaching CS courses, supporting 100+ students through debugging and concept clarification.
- Improved student performance through structured guidance and technical explanations.

Data Warehouse Assistant - Internship

Los Angeles, CA, USA

Superbalife International, LLC

March 2023 - June 2023

- Migrated 50,000+ legacy records from Excel to a structured SQL database, improving data integrity and query efficiency while reducing manual data management time by 22%.
- Developed automated scripts to sort and organize order data, eliminating manual sorting and saving approximately 1 hour of processing time per day.

PROJECTS

KouMe

January 2026 - Present

- Developed a full-stack application using React Native, Expo, TypeScript, Node.js, Express, PostgreSQL, and Redis, supporting signup, login, logout, OTP verification, and password reset workflows.
- Implemented secure session management using JWT access and refresh tokens, RSA key pairs, bcrypt password hashing, SecureStore, token revocation, and protected REST API endpoints.
- Designed a modular backend architecture with controllers, services, repositories, database migrations, and Redis stores, while building reusable frontend components and automated unit and integration tests.

EDUCATION

California State University, Long Beach - GPA: 4.0

Long Beach, CA, USA

Bachelor of Science, Computer Science

August 2023 - December 2026

El Camino College - GPA: 4.0

Torrance, CA, USA

Associate of Science, Computer Information Systems

February 2021 - June 2023

EXTRACURRICULAR ACTIVITIES

- **Design Patterns:** Developed a public repository demonstrating clean code architecture through various design patterns applied in practical programming.
- **Data Structures:** Implemented fundamental data structures and algorithms from scratch, emphasizing efficient operations, clean implementation, and practical problem-solving.
